

Alex Logorz

SOFTWARE ENGINEER AND YOUTUBER

PROFILE

I'm a software engineer and YouTuber that makes easy-to-follow coding tutorials. In Dec 2021, I will graduate from USF, but my journey won't end there. After I graduate, I plan to continue my career as a software engineer and be around people who also share a love for code. If you would like to get to know more about me, please contact me.

WORK EXPERIENCE

● Full stack dev

ASQUAREDROOFING.COM

2 weeks

Paid short-term contract to redesign an old website for a roofing company in Tampa, FL. The owner wanted something simple because his last site was "too cluttered". I was given 2 weeks but finished in less than 48 hours. The website was built using react.

a) Built front end using react and react-bootstrap

● Full stack dev

ALEXLOGORZ.HEROKUAPP.COM

From - Until

My own portfolio website. This website was built using react.

a) Built front end using react and react-bootstrap

● Full stack dev

SOLTRIX.HEROKUAPP.COM

2 months

Soltrix is a world-renowned bachata DJ. This was another short-term paid contract to build his website. Soltrix wanted a website where he can make recent posts and embed his music. This website was built using the MERN stack.

- a) Auth0 authentication for admin portal
- b) The admin can log in to delete and create new posts
- c) AWS to store images
